

**SCADA**

**MicroPANEL: Man/machinery interface solution, dedicated to the supervision and SCADA of installations.**

**DESCRIPTION**

Equipped with the MicroServer or MicroView software on entry level, our screens feature the advanced supervision functions of a SCADA. They also incorporate the graphic capacities and the processing power of a microcomputer.

Economical and efficient, our range of screens constitutes a real alternative if you need to extend or complete the technical possibilities of your dedicated automation systems.

Embedded MicroServer functions : multi-port and multi-protocol communication, SQL databases, automation systems scripts, local data processing, historization, traceability.

**FEATURES**

Available in these versions : 5.7" / 6.4" / 10.4" / 12.1" / 15"...

TFT colour touchscreen - VGA ( 800x600 ).

Backlight resistive touchscreen.

Storage: hard drive or CF card.

Com: RS485 / 422 / 232

LAN 10/100Mbps,

USB, PS2, AUDIO, MIC

Fanless, IP65, NEMA 4

Power supply: 11..36VCC

Embedded software capacities:

- Software workshop µView.
- Animated graphic views.
- Visualization and forcing of variables.
- Mysql database
- Http pages, embedded curve generators.
- Historization of alarms, events administrator.
- Sending of emails et sms.

**APPLICATIONS**

- Monitoring and piloting of installations.
- Data acquisition and processing.
- SCADA
- Driving station.
- Man/machinery interface.
- Command control.
